

SOUTHLINE

TRANSMISSION PROJECT

PUBLIC MEETINGS

The Southline Transmission Project is a proposed 355-mile electric transmission line that will include both the development of new lines and improvements to existing lines in southern New Mexico and southern Arizona.

The project sponsor will be hosting meetings in the coming weeks to gather public input prior to the formal Federal environmental review process that will begin later this fall. Once the official Federal process begins, the Bureau of Land Management and the Western Area Power Administration will host scoping meetings as part of National Environmental Policy Act (NEPA) review.

In September, please visit with our project team to:

- Learn about the proposed project and its purpose and schedule
- Review potential route alternatives using an interactive map station
- Share information about your interests, as well as land and resource issues
- Learn about the upcoming environmental review processes
- Learn about current and future public engagement opportunities
- Learn about technical aspects of transmission

*Please stop by anytime **between 5pm-8pm** at one of the meetings listed below.
Please note there will not be a formal presentation at these meetings.*

Lordsburg, NM
September 21
